# ROPBOND

**Braided & Coated Polyester  
Non Absorbable Surgical Suture U.S.P.**

### Suture Material:

Braided & Coated Polyester  
(Non Absorbable Surgical Suture U.S.P.)

### Raw Material Description:

Polyester surgical sutures are composed of Pre-Stabilised Poly (Ethylene Terephthalate) precision braided around a central core. The braid is then dyed and special processes applied to ensure regularity of diameter, and the best extension for good knotting characteristics.

### Coating:

Coated with Wax / Silicon / Polybutylate.

### Material Color & Specifications:

D & C Green ans also available as undyed  
(Natural White)

### Features:

- High Tenacity.
- Superior lubricity & smooth tissue passage.
- Does not soak up body fluids.
- Flexible and offers optimum knotting
- The non reactive nature of this suture inhibits bacterial growth or infection.
- Ropbond sutures retain original tensile strength over time.

### Packing Color Code:

ROPBOND : Orange ■

### Sterilization:

Ethylene Oxide

### Packing & Availability:

Dry

### Primary packing:

Each suture is wound and packed in an 'easy access' printed folder.

Each folder is individually packed in a peelable Medical grade Tyvek - Polyester laminated polyfilm pouch

### Secondary packing:

12 such Suture pouches packed in a printed box

### USP Sizes available:

USP 6/0 to USP 5.

### Availability:

- With needle Suture lengths 35cms to 150cms & Needle length from 10mm to 90mm.
- Includes variety of Stainless Steel needles like Round bodied, Cutting, Reverse cutting, Taper cutting, Trocar Point etc.
